

2025 SuiteWorld Hackathon 4Good

Overview

The 2025 Suite World Hackathon 4Good supports the NetSuite priority AI Everywhere, Everyday. The challenge brief and related judging will be heavily focused around AI/ML Solutioning. The individual weight of each scoring segment has been removed but can be assumed to descend in importance.

Judging Rubric

Core Deliverables
How well does the ML Solution meet the requirements of the business problem?
How easily and completely does the statistical analysis enable the customer to understand inventory dynamics with relevant details?
Utility
<i>Utilizing the data for decision-making</i>
How well does the full solution enable the customer to make actionable operational or financial decisions?
How well can the customer use and update the model on their own?
Stability
<i>How does the solution handle data anomalies and unknowns?</i>
How well does the ML Solution hold up to gaps in data, outliers, constraints, or unknowns?
How well does the ML Solution scale?
Documentation & Accessibility
<i>How easy is the solution to use and maintain?</i>
Has the team explained how the solution is documented for customer understanding?
Can the customer apply learnings from the solution to independently adjust solution as needed?
